- Nortek Aquadopp current meter interface (via DCM serial interface)
- Temperature sensor with in the sensor/digitiser housing
- Sensor mass position interface, Horizontal sensor mass positions can be used as inclinometers.
- Power supply monitor,
- Power management of al the sensor systems and the external interface.
- Magnetometer Compass and the associated electronics

Power supply wide range input 48 Volts as input Voltage.

Power management circuitry, with current measurement of different circuitry, with the facility to switch off and switch on. Power management to manage single point failure

DATA COMMUNICATION Module (DCM)

TCP/IP interface With multiple serial interface options minimum of 4 serial interfaces

Ability to output encrypted and non encrypted data streams at different samples rates using cryptographic keys full details to be discussed.

Serial Nos: 2216, 2217, 2218

3

Integration of system into titanium housing

Included: Pressure test and certification of the casing and the system at TBD METERS. Can be down to 6000 meters of water depth.

Connectors to be decided. The cost of the connectors not included, Interface to any type of cabling to be discussed. Not included

Included: Test results and calibration information; Cabling and pin outputs of the connector; Documentation and Recording and sensor control software also included.

THESE GOODS ARE OF UK ORIGIN
