Temperature Calibration Report

Customer:	WET Labs, Inc.			
Job Number:	74319	Date of Repo	ort:	5/23/2013
Model Number	WQM	Serial Numb	oer:	WQM 5081
Temperature sensors are normally calibrated 'as received', without adjustments, allowing a determination sensor drift. If the calibration identifies a problem, then a second calibration is performed after work is completed. The 'as received' calibration is not performed if the sensor is damaged or non-functional, or by customer request. An 'as received' calibration certificate is provided, listing coefficients to convert sensor frequency to temperature. Users must choose whether the 'as received' calibration or the previous calibration better represents the sensor condition during deployment. In SEASOFT enter the chosen coefficients. The coefficient 'offset' allows a small correction for drift between calibrations (consult the SEASOFT manual). Calibration coefficients obtained after a repair apply only to subsequent data. 'AS RECEIVED CALIBRATION' Performed Not Performed				
Date: 5/15/2013		Drift since last cal:	+0.0001	Degrees Celsius/year
Comments:				
'FINAL CALIBR	ATION'	✓ Per	rformed	☐ Not Performed
Date: 5/23/2013	3	Drift since 24 Apr 09	-0.0001	Degrees Celsius/year
