

FAQ: What do the C-Star Serial Number Letter Designators Mean?

The letters following the serial number designate the depth rating of the transmissometer and the wavelength of the LED.

Serial number EXAMPLES:

CST-236**PR**→Plastic unit, 600 meter rated, red 650nm*

CST-1219**DG**→Deep unit, 6000 meter rated, green 532nm

Designator key:

P: Plastic unit rated to 600 meters

D: Deep unit rated to 6000 meters

R: Red, wavelength 650nm*

G: Green, wavelength 532nm

B: Blue, wavelength 470nm

*red LED wavelengths changed to 650nm at the beginning of 2009. Contact WET Labs for the LED wavelength of your particular C-star, if necessary!
