

# SeaTube Dive Logging

## Getting Started: On-ship Dive Logging

### STEP 1

#### CONNECT TO THE ON-SHIP NETWORK

- On-ship logging computers use a locally installed copy of Oceans 3.0, instead of the on-shore instance available at [data.oceannetworks.ca](http://data.oceannetworks.ca). To access the local copy:
- Open a browser window (Chrome recommended)
- In the address bar, enter the custom Oceans 3.0 URL provided by ONC Systems:

- Log in to your Oceans 3.0 account

### STEP 2

#### ACCESS SEATUBE DIVE LOGGING

- In Oceans 3.0, select: SeaTube > Expeditions

- In the Expedition Management page, pick an organization, year, expedition, and dive

- Click the Play button to open the main dive logging UI in a new browser tab

### NEED HELP?

More SeaTube documentation available at:

<https://wiki.oceannetworks.ca/spaces/O2KB/pages/72548771/SeaTube+Help>

### STEP 3

#### CUSTOMIZE THE LOGGING UI

- Choose a page layout

- Recommended: 'On Ship' Predefined Layout
- UI elements ("widgets") can be resized, moved, and hidden
- At minimum, you need only the Annotation Entry widget to dive log
- *Tip: if logging from an external video source, remove the video widget from the Dive Logging UI*

- Choose widget options

- Each widget has additional options for information to show or hide
- Enable the Annotation Entry options 'Quick Entry' and 'Attributes'

- Choose a button set in Quick Button Sets

- Start logging in Annotation Entry, using buttons or typing in Comments!

# SeaTube Dive Logging

## Getting Started: On-ship Dive Logging

### Quick Guide: Actions

#### SET UP A DIVE

- Only users with admin privileges have this power
- In Oceans 3.0, go to: SeaTube > Expeditions
- Find and click on the expedition, in the right hand panel labeled SeaTube Catalog click on the 3 dots and Create Dive

- Fill in info in the Dive tab.
- Check SeaTubeReady.
- Save.

#### FIND ANNOTATIONS

##### From a dive:

- Click the filter icon  at the top of Annotation List
- Type search terms in Comment, or Add Filters
- Click Apply Filter

##### From a whole cruise:

- In Oceans 3.0, go to SeaTube > SeaTube Search
- Choose the cruise(s) and dive(s) you want to search
- Type search terms in Comment, or Add Filters
- Click Apply Filter

#### CREATE ANNOTATIONS

*Note about annotation timestamps:* click CAPTURE TIME to preserve a particular time for the annotation; otherwise, the time will be captured when you click Save

##### Comment-only annotations:

- Ensure Annotation Entry is enabled
- Write something in Comment field
- Save

##### Taxon/Button-based annotations:

- In Annotation Entry options, ensure Quick Entry, Capture Time, and Attributes are all selected
- Pick a Button Set from the dropdown list in Quick Button Sets
- Click a button to populate Annotation Entry with that taxon or annotation type
- Fill in Attribute values, add other Attributes, and/or add a Comment
- Save

#### EDIT ANNOTATIONS

- Find the annotation in Annotation List
- Click the Edit icon 
- Edit the annotation fields in Annotation Entry
- Save

### TROUBLESHOOTING

#### SeaTube not looking right?

- Check that you're logged in to Oceans 3.0
- Missing widgets? Use the Layout Options menu to reset the Predefined Layout, or restore hidden widgets
- Annotation Entry not available, even after logging in and resetting the layout? You may not have the necessary permissions to log in your organization's dives. Contact the expedition leader/dive chief to request your name be added to the logging group.
- Expedition not listed in Expedition Management? An expedition needs to have at least one dive marked 'SeaTube Ready' to appear in the list.
- Dive not listed in Expedition Management? Go to the Dive Listing and check that it's marked SeaTube Ready.
