

LISST Text File Format

Collated or Raw Burst Format for Sequoia LISST Text Files

Data Product Options

LISST text file format: Collated Raw

For Sequoia LISST Particle Analyzers, this options controls the format of the LISST text file data product. With the default *Collated* option, the data from the 40 elements is separated in to 40 columns (like a CSV file with 40 sensors). With the alternate option, *Raw*, the data is as reported by the device: sequentially through the 40 elements.

- Collated
