PANGAEA Data Product

An interoperability agreement with PANGAEA enables users to access data in their archive for a specified set of parameters (standards for PANGAEA-supported parameters is available at <http://www.wdc-mare.org/data/standards.html>). For more details on PANGAEA or to access their archive directly, visit <http://www.pangaea.de/>.

Oceans 3.0 API filter: dataProductCode=PDP

Revision History

1. 2010: Data from PANGAEA made available.

Parameters

- **Latitude:** Minimum and maximum latitudes between -90 and 90 are supported.
- **Longitude:** Minimum and maximum longitudes between -180 and 180 are supported.

Formats

CSV

After the query is submitted, a tab separated file is returned containing columns that correspond to latitude, longitude, Date/Time, Measurement Value, and URL for ISO 19115 metadata associated with the measurement.

Example: [PANGAEA_19960513T234611.000Z_19960614T234611.000Z.csv](#)
