63

Image Set raw.zip

"RAW" camera files bundled as "zip" as a set of images taken at the same time.

Oceans 3.0 API filter: `dataProductCode=ISR`

Format

"RAW" is a native camera image file format, and "zip" is the format of bundling the images that were taken at one moment in time (e.g. from a 3D or stereo-matching set of cameras). See below for the device specific parameters.

The software Irfanview can be used to view the .raw files directly. Download it from here:http://www.irfanview.ca/
One also needs to install the plug-in package in order to get the .raw support.

Oceans 3.0 API filter: `extension=zip`

Device-specific Parameters

3D Camera at Folger Pinnacle (DeviceID 20100):

The 3D camera takes sets of 8 images at the same time (bundled in a single zip file).

See attached screen shot for the correct settings for opening the .raw files from the 3D camera.
