

Device Details Help

The **Device Details** page provides detailed information about a selected instrument or infrastructure device.

Click the tabs along the top to access information about the device:

- General - *(General information about the device)*
- [Sensor](#) - *(Individual sensors belonging to the device.)*
- Ip - *(IP address of the device.)*
- [Electrical Rating](#) - *(Voltage, current and power information.)*
- [Data Rating](#) - *(Data sampling info.)*
- [Nameplate](#) - *(Text written on the device nameplate.)*
- [Port](#) - *(Port connecting the device to the network.)*
- Physical Characteristics - *(Physical characteristics of the device – not always provided.)*
- [Device Action](#) - *(History of actions performed on the device.)*
- [Site](#) - *(Listing of all sites the device has occupied since delivery to NEPTUNE Canada.)*
- Additional Attributes - *(Additional information – varies by instrument.)*
- Workflow
- SeaScript
- Parser Definition
- Resource Role

Information Links

Within many of the Device Details tabs, additional details can be accessed by clicking information links.

Sensor

Click **Sensor Id** links to move to the **Sensor Maintenance** page for each sensor on an instrument:

Electrical Rating

Click **Electrical Rating Id** links to see electrical rating information about the device:

Nameplate

Click **Nameplate Id** links to see the contents on the device nameplate:

Device Port

Click **Device Port Id** links to see details about the port the device is connected to:

Device Action

Click **Device Action Id** links to see details about all actions performed on or with a device:

Event

The **Device Event** tab lists all events for a device, including actions, IP configurations, site positions and device & sensor attribute settings. Click the **Id** links for details on each individual event.

Site

The **Site** tab lists all sites where a device has been located, including our Marine Technology Centre (MTC) integration lab and aboard ship, during maintenance operations.

Click the **Site** links for details about the site and a listing of other co-located devices.

Additional Attributes

Click the **Additional Attributes** tab for a listing of any additional settings or attributes pertaining to the instrument. (Not available for all devices.)

Workflow

The **Workflow** tab shows the assigned workflows to the device.
