

New Features Release Notes

This page contains the current year's release notes and new features, primarily for Oceans 3.0, as well as any applications created/maintained by the ONC software development group, including mobile Apps and desktop/PC applications. In progress project status may be presented as well. The information below is written in plain language as much as possible. "Major" releases include all completed items at that time (monthly), while "minor" releases are updates to the previous major release with bug fixes and specific features. Detailed release notes are available on [internal confluence pages](#) (internal users only).

- [2023 Release Notes](#)
- [2022 Release Notes](#)
- [2021 Release Notes](#)
- [2020 Release Notes](#)
- [2019 Release Notes](#)
- [2018 Release Notes](#)
- [2017 Release Notes](#)
- [2016 Release Notes](#)
- [2015 Release Notes](#)
- [2014 Release Notes](#)
- [2013 Release Notes](#)
- [2012 Release Notes](#)
- [2011 Release Notes](#)
- [2010 Release Notes](#)

May 6, 2024 (Pending)

Major release.

Tickets Released: Oceans 3.0: [24.04.000](#) (accessible to internal users only). Total: 131. Automated Testing: [AT.24.04.000](#) total: 34.

April 18, 2024

Minor release for EEW adjustment for spikey geodetic data, Data Search add to cart issue, and new cables page fixes.

Tickets Released: Oceans 3.0: [24.03.002](#) (accessible to internal users only). Total: 4.

April 11, 2024

Minor release to fix driver schedules, formfield in OpenAPI, revamp the Prince Rupert webpage, archiving issue with Kongsberg rotary sonars and more.

Tickets Released: Oceans 3.0: [24.03.001](#) (accessible to internal users only). Total: 8.

April 4, 2024

Major release

Maintenance

New Features or Improvements

- Created database tables and web services for new cable management tool
- Improve performance of DeviceCategoryService
- Ability to delete deviceportid through UI
- Ability to create new parser definition through UI
- Add Modified Date and Modified By of mobile/fixed site position on Site page
- Add tooltips for data product selection table on Data Search page
- Change default zoom level to display all deployed nodes on Data Search page
- Change minimum zoom level on Data Search page
- Sort Instruments by JVM on Device Console page
- Add ability to sort columns of data product attributions on Network Console
- Python client library updates, new process for Python development and continuous integration and automated testing (internal feature)
- Many new / updated / fixed automated tests

Bug Fixes

- Broken "Contact Us" links
- Fix broken QAQC inheritance
- System Console sometimes displays the wrong Oceans Next version

SeaTube

- Finishing 10+ on-ship server support
- Support timecode testing and fixes
- MUI 5 upgrade (in progress)
- Refactoring buttons in Ocean-Next
- Minor improvements and bug fixes

ExperimINTED

- Fix issue with Batch Dropdown closing immediately in Firefox

CIOOS & CIOOS / Community Fishers

- Propagate translation changes to all machines so jobs get the latest data
- Cast DOIs:
 - create via a job triggered by cast review, optional and turned off by default
 - DOI added to site device maintenance page

Latest Hydrophone Player (in-progress)

- Supports selecting latest file in config (not supported in display yet)

Community Fishers

- Add .csv option to CF map historical casts and lasso table
- station overlap/decommissioning
 - Ensure 1:1 relation between search tree and geospatial areas
 - Add datefrom, dateto, and comment columns to manage CF stations
- Cast checkboxes improved
- New device package information page (not yet in the menus)
- Add xChange sensortype and sensor information
- Add SiteDeviceSubsetName into Aligned And Depth Binned data product files headers
- Fixed: downloads from the front of the castpopup card are not being added to the downloaded casts list
- Parser fix for AML-6 (only an issue for testing)
- MUI 5 upgrades: buttons, translation, storybook updated to version 8, etc. (in progress)
- Upgrade O3 System Banner

Data Products

- MATLAB client library (will be separate release)
- Testing and fixes for NetCDF generation/regeneration for ERDDAP (RDI ADCPs only so far)

EEW & Endeavour Catalogue

- EEW investigations and minor fixes, including limiting acceleration data download job to 30 days at a time
- Support new PNSN devicetype
- Endeavour Earthquake catalogue: create ingestion job, email notifications and database schema (in-progress)

Instruments

- Bug fix for Nortek Current Profiler driver that was resulting in memory overflow - caused by a particular configuration edge case
- New permissions for driver start/stop. Uses a new stations specifier to limit permissions to certain locations for specified groups. Enables staff to more easily test instruments.

Tickets Released: Oceans 3.0: [24.03.000](#) (accessible to internal users only). Total: 131. Automated Testing: [AT.24.03.000](#) total: 34.

Usability

- [\[DMAS-52136\]](#) - layout menu closes after single selection

Bug

- [\[DMAS-75905\]](#) - Fix inconsistencies in widget titles and Add Widget dropdown titles
- [\[DMAS-77269\]](#) - Batch Dropdown in Oceans 3 menu closes almost immediately in Firefox
- [\[DMAS-78929\]](#) - Playlist playback page crashes with a large playlist ID and a clip ID
- [\[DMAS-79350\]](#) - ToggleAllCasts value in CFOverlay is not properly updated depending on state of checkboxes
- [\[DMAS-79371\]](#) - Oceans Next deployment reports the wrong version
- [\[DMAS-79378\]](#) - Error highlighting does not work on the Taxon autocomplete in Deck Log
- [\[DMAS-79422\]](#) - SeaTube Search playlist snackbar needs a way to stay open until explicitly dismissed
- [\[DMAS-79458\]](#) - Synchronizer management page Date From field can get prematurely disabled

- [DMAS-79477] - Parser Test for AML-6 LGR is mixing up multiple temperature sensors
- [DMAS-79479] - Try to fix CastPopup cypress test failures
- [DMAS-79537] - Search fails if its quickly cancelled then restarted
- [DMAS-79554] - downloads from the front of the castpopup card are not being added to the downloadedcasts list
- [DMAS-79563] - DataProductRequest api service not handling default values for dmaskeyvalue FormFields correctly
- [DMAS-79618] - Fix tsconfig warnings
- [DMAS-79623] - citation returns null in some of the external web services in QA
- [DMAS-79629] - 'Data Product Upload - batch' task erroring
- [DMAS-79665] - Removing and adding the Annotation Entry widget crashes the Deck Log page
- [DMAS-79668] - Fix post-refresh scripts for non-prod environments' synchronizer tables
- [DMAS-79675] - QAQC reprocessing doesn't handle inheritance as it should
- [DMAS-79681] - Storybook failing after upgrade to v8
- [DMAS-79699] - Oceans 3 main branch fails to start in QA
- [DMAS-79718] - Storybook deployment fails on new Jenkins agents
- [DMAS-79729] - Dataset Landing Page test failing due to label

User Story

- [DMAS-76357] - As a software developer, I want to migrate the Taxonomy page to Oceans Next in order to simplify maintenance
- [DMAS-76402] - As a system admin, I want to manage which datasync queues receive messages so that I don't have to do too much manual clean up
- [DMAS-77861] - As a community fishers program member, I would like a service that gets information about deployed device packages
- [DMAS-78606] - As a ST Search/Playlist user, I would like see detailed error messages if there is a error while I am creating a playlist using ST Search so that I can report the error and take actions.
- [DMAS-78726] - As an Erddap Operator I would like improvements to the minimally implemented ErddapNetCdfPostProcessor
- [DMAS-79086] - As a ST user, I would like a modernized dive log page built in the same way as the deck log
- [DMAS-79403] - Display cast DOIs on the Site Device Subset Maintenance page
- [DMAS-79414] - As a SeaTube developer, I want ship-shore synchronization to use the modern MQ service framework
- [DMAS-79467] - As a dev, I'd like to make synchronizer deployments require a dateTo

Task

- [DMAS-74035] - Improve the performance of DeviceCategoryService
- [DMAS-74587] - As a data steward, I would like to be able to delete device ports in the UI
- [DMAS-78023] - As a data steward, I would like the site page modified date to include changes made to the site's position
- [DMAS-78425] - AS a Data Steward I would like to be able to filter attributions in Network Console based on Role or DateFrom
- [DMAS-78702] - Addition of ORP Sensor for NOAA: add to ST display
- [DMAS-78720] - Refactor PlaylistService's permission handling
- [DMAS-78855] - Add SiteDeviceSubsetName into Aligned And Depth Binned data files header
- [DMAS-78981] - Make sy_translation cache consistent for task cache
- [DMAS-79364] - Integrate cast selectedCastsSelectedBox with selectedStations
- [DMAS-79375] - Replace FileLocation.fullpath with FileLocation.getFile where possible
- [DMAS-79377] - Setup continuous integration for Python data products code
- [DMAS-79380] - Support new PNSN deviceType 947
- [DMAS-79424] - Support creating a parser definition from a devices parser definition tab
- [DMAS-79452] - Device Console sort Instruments by JVM
- [DMAS-79466] - As a sysadmin, I'd like the Synchronizer Management table to support sorting and grouping columns so that it's easier to find data
- [DMAS-79509] - Clean up dependency pseudo-cycles around usermanagement and infrastructure
- [DMAS-79518] - Add post-refresh scripts for non-prod environments' synchronizer tables
- [DMAS-79536] - Update new dive log route to match oceans3 url
- [DMAS-79538] - Investigate the 2024-03-06 missed earthquake
- [DMAS-79565] - Send emails when entries are added to the earthquake catalog page
- [DMAS-79597] - Create a test plan for ST Configuration
- [DMAS-79603] - Add titles to organization logo images
- [DMAS-79610] - Upgrade O3 System Banner
- [DMAS-79651] - Upgrade storybook to version 8
- [DMAS-79687] - limit continual acceleration download job to a max of the past 30 days.
- [DMAS-79709] - Only Create metadata for PNSN devices in the EEW event definition

Implementation

- [DMAS-76983] - Update backend for General Tab Maintenance
- [DMAS-77695] - Expand Data Search data product selection table tool-tips
- [DMAS-78452] - Add .csv option to CF map historical casts and lasso table
- [DMAS-78615] - Create and map new dataproduct to Community Fishers devices - SQL
- [DMAS-78844] - Update PlaylistService and PlaylistLineService to successfully create/update a playlist when an annotation is missing video and include broken clips in the result playlist
- [DMAS-78901] - Synchronize to only certain destinations according to the message being synchronized
- [DMAS-79026] - Generate DataCite XML for casts - Database
- [DMAS-79053] - Implement webservice for device workflow bulk update
- [DMAS-79085] - Add a button in SeaTubeV3 that links to the "new" dive log
- [DMAS-79095] - Add datefrom, dateto, and comment columns to manage CF stations
- [DMAS-79163] - Extract generic system command API to new OSGi bundles
- [DMAS-79182] - Re-implement Buttons.jsx Cancel
- [DMAS-79183] - Re-implement Buttons.jsx Delete

- [DMAS-79186] - Re-implement Buttons.jsx Create
- [DMAS-79187] - Re-implement Buttons.jsx Clear
- [DMAS-79225] - Add a Save & Keep Time button to the deck log Annotation Entry widget
- [DMAS-79235] - Create a class for passing remote log messages
- [DMAS-79238] - Create a class to handle the remote error message synchronization
- [DMAS-79244] - Create servlet for new dive log
- [DMAS-79366] - Reformat code to prepare for services
- [DMAS-79369] - Create a TransactionControl class & service
- [DMAS-79396] - Generate DataCite XML for casts - ONC
- [DMAS-79405] - Add message to snackbars when created/updated playlist has clips with missing video
- [DMAS-79411] - Implement the public API for annotation conversion
- [DMAS-79415] - Send datasync messages using DataSyncMessagePublisher
- [DMAS-79416] - Refactor DataSyncServiceActivator to implement MessageListener, not DmasServiceActivator
- [DMAS-79459] - Add xChange sensor information
- [DMAS-79461] - create scheduled job for endeavor event data ingestion
- [DMAS-79464] - Show DOI on site device subset management page
- [DMAS-79471] - Add completed time & size to the search
- [DMAS-79483] - Set dateto on cu_synchronizerdeployment not null
- [DMAS-79484] - Update oceans3 logic to not allow null dateto for synchronizer deployments
- [DMAS-79485] - Update oceans-next to not allow null dateTo for synchronizer deployments
- [DMAS-79517] - Change DOI Retrieval to use resourceid, resourcetypeid
- [DMAS-79523] - Move selectedStations into a context
- [DMAS-79525] - Ensure 1:1:1 relationship between searchtreenode:searchtreenodegeospatialarea:geospatialarea
- [DMAS-79541] - Add SiteDeviceSubsetName into Aligned And Depth Binned data files header - Java
- [DMAS-79542] - Add SiteDeviceSubsetName into Aligned And Depth Binned data files header - Matlab
- [DMAS-79551] - new methods in SensorTypeService to support create and update sensortype
- [DMAS-79572] - Rebundle Token persistence code
- [DMAS-79573] - Rebundle Station persistence code
- [DMAS-79574] - Rebundle GeospatialArea persistence code
- [DMAS-79584] - create im_cableactiontype table and its trx table
- [DMAS-79585] - create im_cableaction table and its trx table
- [DMAS-79586] - create im_cabletype table and its trx table
- [DMAS-79587] - create im_connectortype table and its trx table
- [DMAS-79588] - add several new columns in im_cableextension table
- [DMAS-79595] - Add global property to specify task to run on cast review
- [DMAS-79596] - Run task from global property when cast reviewed
- [DMAS-79606] - Create page for Community Fishers Device Package Info Page
- [DMAS-79611] - Implement latest hydrophone config option in Data Player Widget
- [DMAS-79614] - Remove Site Device from DOI Dataset
- [DMAS-79615] - Regenerate .csv data files for newest cast at a location
- [DMAS-79617] - Make SiteDeviceid column nullable
- [DMAS-79620] - update cableextension hibernate file to change name to comment
- [DMAS-79621] - Add accordions to the Community Fishers Info page
- [DMAS-79634] - Implement the methods in SynchronizationLogger created by DMAS-79238
- [DMAS-79636] - Implement type-specific synchronization strategies
- [DMAS-79649] - Make siteDeviceid column nullable in trx table
- [DMAS-79653] - Add prop for translationOptions to be passed into Buttons
- [DMAS-79688] - Add cards with device information to accordions
- [DMAS-79695] - Clean up minor logging dependencies
- [DMAS-79706] - Add the log4j2 API jar to our build environment
- [DMAS-79708] - Add sensor type to XChange sensor information for use in front end
- [DMAS-79734] - change the min zoom level to 0

Test

- [DMAS-79205] - Testing NetCDF generation/regeneration for erddap
- [DMAS-79318] - Create webservice automation tests
- [DMAS-79641] - Unit test for Sensor Load feature

Bug (ST)

- [DMAS-79571] - jest tests don't setup i18n correctly
- [DMAS-79741] - Creating a new DOI for a subset does not set related identifiers

Design

- [DMAS-79556] - Create UI mockup
- [DMAS-79600] - Create a method for running regression tests on doi datasets

March 25, 2024

Minor release to fix synchronization issues (SeaTube), plus task, EEW and minor fixes.

Tickets Released: Oceans 3.0: [24.02.002](#) (accessible to internal users only). Total: 9.

March 10, 2024

Minor release for Nortek driver issue (driver machines only, no downtime).

Tickets Released: Oceans 3.0: [24.02.001](#) (accessible to internal users only). Total: 1.

March 5, 2024

Major release

Maintenance

New Features or Improvements

- Add Modified By and Modified Date on Device Workflow Admin page
- Database improvements: improve a number of constraints on field lengths, remove a few deprecated tables, update a few _hist tables to _trx tables for better auditing.
- Remove deprecated code: CANARIE Registry, adcpdata API
- Quarter-scalar-data-generation-cassandra limit number of records to be processed each time
- Update date format for QAQC reprocess and QAQC deletion jobs
- Change property value from sensortypename to sensortypecode in Data Search URL

Bug Fixes

- CSV/JSON data products header should report metadata file name with .xml not .pdf
- User Management: "Select All" doesn't select all data products
- Plotting Utility: Quarter scalar data includes data outside of deployment when it should not
- Updates and bug fixes in automated testing

Community Fishers

- Feature of the month! See: <https://community.oceannetworks.ca/posts/oceans-30-software-updates-for-february>
Added button to download all cast from a station
- Reworked selected download check boxes on Cast Selection pop-up
- Added support for Rinko-FT devices in the Community Fishers Pipeline and Data Products
- Initial implementation backend & webservice to get CommunityFishersDevicePackage info
 - added xChange sensor information
 - added last verification date, last calibration date per device
 - moved CommunityFishersDevicePackage to device bundle

Community Fishers - APP

- The Community Fishers App version CF.3.2.10 has been released with a summary found here: <https://jira.oceannetworks.ca/projects/DMAS/versions/13379>
- Or alternatively, a brief rundown:
 - automated tracking of android tablet version
 - removed auto update notification
 - added new help menus/manuals
 - integrated Wi-Fi and Bluetooth connection more closely with Android
 - fixed loading from archived log/ctd data creating an unclose-able menu
 - various performance improvements under the hood

Acoustic Instruments Data Viewer

- added a reference URL to custom taxons (front-end)
- Fixed: Data Search for all available data doesn't return all the data (high-priority bug)

Data Products

- Two very minor bug fixes and automated testing improvements.

Infrastructure

- Restricted/testing environments only allow a subset of users to log in (secondary security to VPN/firewalls)
- Remove abandoned "Camera Shut Down" application and "Complex Data Viewer" (v1 & v2) pages
- Abort a deployment & shut down if Oceans 3 tries & fails to connect to its database
- Modernize code behind Taxonomy Management page

Dashboards

- Data Source Selector Widget now shows sources in a table
- Location Selector now uses public API/locations service (much faster)
- Fix: Audio player now goes to the correct location to play FLAC files
- Fix: Data Player Widget can now be used anonymously

CIOOS Pacific

- Add tab to Agreements to edit and view local context labels

ExperimentED

- Remove incorrect ERROR logging in the DOI registration job (378)
- Link available from Data Search page to go to Search History page
- When running a batch an email can be sent under various conditions

Earthquake Early Warning, API and Tasks

- Now continually sending acceleration data to IRIS on some high bandwidth land sites
- Add message to API when requesting restricted data
- Improved response descriptions on the open API page
- Add better messaging when a default value is used on dataProductDelivery API
- Wrap text on browser telnet console page
- Simplify logic for running tasks and don't send tasks over the scheduler topic

SeaTube

- Finished most phase 1 features in supporting 10+ on-ship servers
- In-progress: DateTimePicker for MUI 5 updates, annotation ingestion parser, refactoring DiveLog to use the same framework as the DeckLog
- Minor improvements and bug fixes

Instruments

- Subc MK5/6 driver zoom function updated
 - Device does not report current zoom location. Driver now generates the current zoom location by counting the number of zooms in from the maximum zoom out.
 - Add new sensor attributes for the total number of zoom positions and largest zoom step size, accounting for differences in model years.
- In-progress: Camera Interface Board driver

Tickets Released: Oceans 3.0: [24.02.000](#) (accessible to internal users only). Total: 168. Automated Testing: [AT.24.02.000](#) total: 8.

Bug

- [\[DMAS-32067\]](#) - Large amount of text in some fields prevents account from being created and gives an unhelpful error message
- [\[DMAS-67313\]](#) - Since 2021-12-01, The datasync queues are receiving thousands of messages
- [\[DMAS-74241\]](#) - Save button is displayed on some pages for anonymous users
- [\[DMAS-75460\]](#) - CSV/JSON products metadata file name in header should say .xml not .pdf
- [\[DMAS-78229\]](#) - Data Search for all available data doesn't return all the data
- [\[DMAS-78337\]](#) - Task DOI-Registration-job-deviceTypes (378) is failing every run
- [\[DMAS-78715\]](#) - Pamguard configuration file uploader not working
- [\[DMAS-78902\]](#) - Pamguard sub-tasks status not updated with parent batch
- [\[DMAS-78958\]](#) - Disable the save button in the AddCollectionDialog on playlist discovery when fields are not filled in
- [\[DMAS-78962\]](#) - Add missing task type entry for pamguard batch
- [\[DMAS-79058\]](#) - In playlist playback page, the play speed control will go back to normal speed after a clip is done even the display is the same
- [\[DMAS-79112\]](#) - Playlists with missing clips display the text "clip-thumbnail" as the clip thumbnail
- [\[DMAS-79124\]](#) - Search failure in state of ocean plot in QA for negative values
- [\[DMAS-79165\]](#) - Enable strict null checking for Task Management
- [\[DMAS-79172\]](#) - Community Fisher pipeline error when editing end time
- [\[DMAS-79197\]](#) - dmas-ldap-export.sh writes comments to ldif export
- [\[DMAS-79212\]](#) - User Management: "Select All" doesn't select all data products
- [\[DMAS-79217\]](#) - Error loading some older earthquake detail pages
- [\[DMAS-79220\]](#) - The Running Tide Camera zoom is not responding to sea script
- [\[DMAS-79228\]](#) - organizationagreementdevice has null deviceid
- [\[DMAS-79252\]](#) - Audio Player not playing FLAC file
- [\[DMAS-79265\]](#) - A taxon or taxonomy with no children displays as having a child in the tree widget
- [\[DMAS-79267\]](#) - Fix the spelling of the Synchronizer Management page URL
- [\[DMAS-79279\]](#) - Data Player Widget fails to make service calls to fetch spectrogram data
- [\[DMAS-79286\]](#) - The thumbnail image is not display well for fixed location camera in playlist
- [\[DMAS-79289\]](#) - Error initializing archive file manager in QA
- [\[DMAS-79296\]](#) - OrganizationService not working
- [\[DMAS-79299\]](#) - Quarter scalar data includes data outside of deployment when it should not
- [\[DMAS-79304\]](#) - In QA calibration formulas cannot be saved anymore since the "Save" button was removed
- [\[DMAS-79306\]](#) - Unable to see deployments if there is a deployment with a null dateTo value
- [\[DMAS-79312\]](#) - ArchiveFileManager getByDevice results in NPE
- [\[DMAS-79313\]](#) - Can't sync anything in QA
- [\[DMAS-79326\]](#) - Changing a taxon's common name fails with an org.hibernate.SessionException: Session is closed

- [DMAS-79389] - Data Player Widget makes repeated webservice calls when accessed anonymously
- [DMAS-79394] - Applied QAQC tab on device details page does not work as expected in QA
- [DMAS-79395] - Fix misuse of getmatlabjobdatabytaskid function in castdatacorrectionpostprocessjob
- [DMAS-79409] - UVic task machines must not listen to the datasync queue
- [DMAS-79419] - Fix QA bug of Save Button not appearing on some pages
- [DMAS-79426] - fix archive file api not filtering restriction warning messages correctly in QA
- [DMAS-79435] - Race condition in Expedition Management landing page
- [DMAS-79441] - Unable to save or edit an annotation
- [DMAS-79443] - Can't sync message in QA due to ClassNotFoundException
- [DMAS-79447] - NullPointerException when saving synchronizer deployment with null dateTo
- [DMAS-79449] - API /scalardata/device returns incorrect actualSamples when rowLimit is set
- [DMAS-79451] - Quarter scalar job never terminates in QA
- [DMAS-79456] - Updating a synchronizer deployment doesn't update modifyby or modifydate
- [DMAS-79457] - Synchronizer management page crashes when toggling Start Now while editing a deployment
- [DMAS-79473] - Erroneous ISO19115 xml metadata for Camera System in QA search automation
- [DMAS-79474] - QA machines fail to *restart* due to ClassNotFoundException
- [DMAS-79482] - Issue for Save button on SiteDeviceSubsetMaintenance
- [DMAS-79489] - hostname not set correctly when task queued for not uvic shorestation in QA
- [DMAS-79498] - .gz files don't appear in Data Search .zip download
- [DMAS-79515] - Cannot cancel a running task

User Story

- [DMAS-76402] - As a system admin, I want to manage which datasync queues receive messages so that I don't have to do too much manual clean up
- [DMAS-77348] - Link to Search History Page from Data Search to improve accessibility of page
- [DMAS-77692] - As a Community Fishers users, I want to download all casts from one station on Community Fishers Map without having to go to Data Search
- [DMAS-77978] - As a batch management user I would like to have batch tasks automatically run in sequence
- [DMAS-78339] - As a dev, I would like to see consistent date format on UI pages
- [DMAS-78482] - As a system admin, I want to see whether synchronizers are deployed so I know which message queues need to be managed
- [DMAS-78483] - As a system admin, I want to create synchronizer deployments so I don't need to manage their queues myself
- [DMAS-78484] - As a system admin, I want to edit synchronizer deployments so I can end deployments
- [DMAS-78575] - As an API user, I'd like better messaging when I hit restricted data
- [DMAS-78797] - As a user, I would like to see Modified Date and Modified By info on Device Workflow Admin page
- [DMAS-79057] - Ensure all ST-related synchronized tables use ModGenerator
- [DMAS-79224] - Clean up activation and bundling of DataSyncServiceActivator
- [DMAS-79429] - Define Storybook usage and standards

Task

- [DMAS-35284] - Quarter-scalar-generation: limit number of records to be processed each time
- [DMAS-67742] - Change property value from sensortype name to sensortype code on url of data search
- [DMAS-73214] - Deprecate CANARIE registry endpoints and supporting code
- [DMAS-74080] - Remove DataProductFormatAttribution table
- [DMAS-77454] - change cruiselivestream_hist_seq to cruiselivestream_trx_seq
- [DMAS-77899] - Convert organizationagreement varchar columns to text to allow any length
- [DMAS-77990] - Prototype a script to export a subset of users from one LDAP instance to another
- [DMAS-78603] - Add unit tests for getmatlabgetjobdatabytaskid
- [DMAS-78975] - Clean up unused and unneeded parts of NeptuneVelocityServlet
- [DMAS-79094] - Support parsing path params in DmasRestService
- [DMAS-79144] - Update Required Date Format in QAQC Results Deletion and Reprocess Jobs
- [DMAS-79149] - Delete unused CSD application
- [DMAS-79191] - Move task email sending into a single place
- [DMAS-79194] - Clarify what networking tools a user needs to run npm run deploy:oceans3
- [DMAS-79208] - OpenAPI - update description fields for all the different services
- [DMAS-79210] - Simplify renovate build process
- [DMAS-79215] - organizationagreement has hist and trx tables
- [DMAS-79221] - Remove deprecated adcpdata service
- [DMAS-79232] - Support using TypedBaseDAO.saveOrUpdateList on types with non-zero unsaved PK values
- [DMAS-79254] - Update label id for dropdowns on the DeviceActions page for testing purpose
- [DMAS-79270] - Support Rinko-FT devices in the Community Fishers Pipeline and Data Products
- [DMAS-79278] - If Hibernate fails to connect to the DB during a deployment with --watch, shut down affected servers so they don't spam the logs
- [DMAS-79301] - Remove the abandoned ComplexDataViewer page
- [DMAS-79308] - Support hiding some columns from the table of deployed synchronizers on the Synchronizer Management page
- [DMAS-79309] - simplify logic for when a task can be ran and bypass scheduler topic
- [DMAS-79348] - Update recurring search user info to align with current use
- [DMAS-79352] - Add the Synchronizer Management app to Ocean3 menu
- [DMAS-79357] - Remove the ChartContainer react component
- [DMAS-79368] - wrap text on telnet console page
- [DMAS-79397] - Update earthquake catalog page with correct detection area lat lon
- [DMAS-79398] - Set user permissions for the Synchronizer Management page
- [DMAS-79400] - Add synchronizer id to the synchronizer deployment UI
- [DMAS-79420] - Update directory where EEW mseed files get downloaded to

Implementation

- [DMAS-76355] - Generate IDs for synchronizable objects using a server's synchronizerId
- [DMAS-76898] - Write skeleton code for device details GeneralTabPage
- [DMAS-78159] - Write the Cypress skeleton code for the GeneralTabForm component
- [DMAS-78270] - Replace the original Taxonomy page with the new one
- [DMAS-78320] - Save changes to taxons and taxonomies
- [DMAS-78327] - Get a list of active & future synchronizer deployments from the backend
- [DMAS-78328] - Display a table of active and upcoming synchronizer deployments
- [DMAS-78329] - Extend the create dialog to support editing a synchronizer deployment
- [DMAS-78331] - Save a new synchronizer deployment in the backend
- [DMAS-78332] - Save new synchronizer deployments on clicking Save in the create dialog
- [DMAS-78333] - Add a Create Deployment button to the synchronizer management page's table widget
- [DMAS-78340] - update date format for modified date or modify date on Actions, DeviceType, DeviceCategory, Organizations pages
- [DMAS-78342] - update date format for modify date or modified date on Device Sync and DataPreviewManagement pages
- [DMAS-78344] - update date format for modified date or modify date on qaqc auto test finder and auto test details pages
- [DMAS-78437] - Display a form on clicking the Create Deployment button
- [DMAS-78438] - Add validation to the Create Deployment dialog
- [DMAS-78485] - Update a synchronizer deployment in the backend
- [DMAS-78486] - Update an existing deployment on clicking Save in the edit dialog
- [DMAS-78637] - Implement users receiving optional emails when batch pauses or completes - ONC
- [DMAS-78638] - Clean up the paths of the new taxonomy page in Oceans Next
- [DMAS-78794] - Update "Playlist Created" snackbar to link to the playlist
- [DMAS-78813] - Extract QAQC persistence code to OSGi bundles
- [DMAS-78865] - Re-implement Buttons.jsx Save
- [DMAS-78894] - Create tab for network console for local context project and service for getting project id
- [DMAS-78895] - Create front end based off design for displaying local context project
- [DMAS-78906] - Create a table view for displaying data sources
- [DMAS-78948] - Return an error when TaxonomyMatrixAttributeService can't update or delete a taxon
- [DMAS-78964] - Add a reference URL to custom taxons (frontend)
- [DMAS-78978] - Return an IResourceName from NeptuneVelocityServlet.getResourceId
- [DMAS-78983] - Have synchronizers connect to all synchronizers' datasync queues for publication
- [DMAS-78987] - Create a management service for the synchronizer management UI
- [DMAS-79004] - Convert Create*, Add* Buttons to use new format
- [DMAS-79034] - Use locations/tree public service to get tree
- [DMAS-79071] - add Modified Date and Modified By to Process
- [DMAS-79072] - Update mapping files to use ModGenerator
- [DMAS-79073] - Remove now-unused sequences and defaults using them
- [DMAS-79074] - Implement users receiving optional emails when batch pauses or completes - Oceans Next
- [DMAS-79079] - populate data product availability tables for live data when archive file entries are created
- [DMAS-79083] - Return a list of synchronizers from the backend when /internal/synchronizer is called
- [DMAS-79093] - Update useSnackbars hook to accept and use the `actions` prop
- [DMAS-79098] - Create synchronizers for task servers and rename existing prod synchronizers to match hostnames
- [DMAS-79147] - Support a messageType field distinct from the messageClass
- [DMAS-79179] - Write the skeleton code for GeneralTabPanel
- [DMAS-79180] - Write skeleton code for GeneralTabForm
- [DMAS-79184] - Hook up the buttons in GeneralTabForm so they work
- [DMAS-79229] - Create a service call to return all MQ locations
- [DMAS-79243] - Create a new DiveLogDashboard component
- [DMAS-79250] - add Modified Date and Modified By to Phase
- [DMAS-79263] - Rebundle DataSyncServiceActivator
- [DMAS-79264] - Clean up DataSyncServiceActivator activation
- [DMAS-79266] - add Modified Date and Modified By to Task Editor
- [DMAS-79271] - Rebundle enums in IFileLocationConfig
- [DMAS-79272] - Remove dependency of extension.synchronization.api on core.usermanagement.api
- [DMAS-79288] - Return Files from FileLocation
- [DMAS-79300] - Implement skeleton webservice to get device package info
- [DMAS-79319] - Implement ability to get all Community Fishers Device Packages
- [DMAS-79325] - Move CommunityFishersDevicePackage to device bundle
- [DMAS-79401] - Create wrapper on Community Fishers device packages with extra info for info page
- [DMAS-79408] - Create an API for annotation converters
- [DMAS-79428] - add message when a default value is used in the data search api
- [DMAS-79431] - Create styleguide for buttons
- [DMAS-79434] - Configure backend to allow for CORS preflight OPTIONS call and PATCH permissions
- [DMAS-79436] - Replace logging jars with pax-logging-api
- [DMAS-79439] - add modify info to deviceprocessgroup table
- [DMAS-79448] - Add last verification date, last calibration date per device

Test

- [DMAS-78302] - Update UI tests to work with the new taxonomy page

Bug (ST)

- [DMAS-79303] - Response from /internal/synchronizers/deployments is missing a deployment's organization & user
- [DMAS-79311] - RDI ADCP Wave devices are getting a datasets.xml section for Codar device types

Requirement

- [DMAS-78518] - Gather requirements for Community and device package UI

February 15, 2024

Minor release for CF AML-6 CTD parser and logging issue.

Tickets Released: Oceans 3.0: [24.01.002](#) (accessible to internal users only). Total: 2.

February 12, 2024

Major release, covering December thru January.

Maintenance

New Features or Improvements

- Standardized data format for Modified By and Modified Date Oceans 3.0 pages
- Python API library documentation update
- Update web services to add Modified By and Modified Date for device workflow admin page
- Allow to close enlarged images on Search Hydrophone Data page
- Add new data source filter "Restrict data source selection to map-view" on Data Search page. Off by default to prevent tree-trimming.
- Add another order by (modifydate desc) for deviceattributes or sensorattributes on Device Details display
- Draggable dialog box on Device Category page
- Allow colons in the field label of fornfield entries
- Remove groundfault alarm setting for mini JunctionBox with 400 volt ports
- Lots of new or updated or fixed automated tests

Bug Fixes

- Fix ticket creation which was broken by Jira upgrade

Internal projects

- Java 17 upgrade project is officially complete
- Various small deployment improvements: better logging, reduce errors, improve validator warnings
- Support refactoring ship-shore-synchronizing managers into OSGi-services mid-season
- Drop support for IE9

Dashboards (in support of Acoustic Data Viewer)

- DEV/QA only data selector widget beta

CIOOS

- Use correct version of DOI link now that CKAN supports it
- Local Contexts - in progress - support association of Local Contexts project ID with Organization Agreement, display labels associated with project
- Fixed issue with CKAN harvest jobs not finishing

ExperimINTED/Task Management

- Remove pagination for Batch Tasks - all top-level batch tasks now show on one page to make sequencing simpler
- Batches now support auto-run
- We now support a pipeline job which will run the specified set of jobs sequentially
- Bug fix: running DOI registration jobs metadataOnly updates DataCite correctly again

EEW

- Fixed a bug where site detections could show up multiple times if they didn't have a p-wave or s-wave attached on the earthquake detail page.

API

- Removed userId parameter from ScalarDataAPIService (not the public API service) to improve security.
- Support default data product options in the data product delivery service. Also ignore any incorrect options a user provides. Response contains the corrected URL.
- Remove scalar data get by station API
- Have user input persist on the OpenAPI page if they enter it while logged out and then log in to try their query.
- Add deviceCode filter to the OpenAPI deployment service page. The API already supported it but it wasn't listed on the OpenAPI page.
- Improve performance of the get location and get location tree services

- Update all public API services to support an appToken (for dashboards)
- Update the citation response from delivery API services to include fields for the DOI, landing page link, and query pid in addition to the citation string.
- Added filters to the location tree service so it has all the same ones as the get location service.

Data Products

- Bug fixes: Nortek data for rest of day is missing after a configuration change (in some cases), slow/stuck RDI reading with gappy data
- Better plot titles for supporting global data
- ERDDAPnetCDFpostProcessor ready: added features for automatic dataset switch over as we populate, handling of re-postprocessing, chunking for reliability, filters by device and time for live and re-postprocessing, edge cases

SeaTube

- Finished Playlist update project phase 1
- In-progress: supporting 10+ onship servers
- Some minor improvements
- A few bugs fixed

Community Fishers

- Fixed multiple lasso tool bugs
- Fixed CF duration limit accidentally applied to all siteDeviceSubset types
- Fixed CF App Wi-Fi Regression Test patch for CF.3.2.10
- Added DeviceTypeAttribute to track android SDK version for devicetype 267
- Dropped the ErddapDatasetAttribute and ErddapDatasetAttribute_hist table
- Converted CFOverlay to a functional typescript component
- Refactored Cast Selection popup out of CFOverlay
- Added mapId to the context so it isn't passed around everywhere
- Fixed lasso tool on CF map contains undefined reference to assignedCastData
- Added 118n to cut down on code maintenance for Buttons in React

Tickets Released: Oceans 3.0: [24.01.000](#), [24.01.001](#) (accessible to internal users only). Total: 254. Automated Testing: [AT.24.01.000](#) total: 44.

Bug

- [\[DMAS-78840\]](#) - The mat-format data products for the AZFP Echosounder (55036) at DDL have unexpected units in the profileData
- [\[DMAS-79231\]](#) - Tasks that cannot be executed due to singleton constraint result in a NPE
- [\[DMAS-74752\]](#) - Order device attributes by datefrom desc, modifydate desc on device details/additional attributes page
- [\[DMAS-77991\]](#) - Description collapse text displays for all playlists in Firefox
- [\[DMAS-78330\]](#) - Synchronization managers can't be referenced
- [\[DMAS-78418\]](#) - I can't modify or delete button sets I create
- [\[DMAS-78592\]](#) - Data Search filter misbehaves when changing between tree types with active filters
- [\[DMAS-78594\]](#) - Links to DOI Dataset Landing Pages broken for all CKANs
- [\[DMAS-78621\]](#) - Can't set Junction Box alarm values for BPS miniJB028
- [\[DMAS-78699\]](#) - Fix tests failing due to update of esri-leaflet to v3.0.12
- [\[DMAS-78721\]](#) - Lassoing irregular shapes causes duplicate cast lasso items
- [\[DMAS-78738\]](#) - Titles in matlab plots don't know about South
- [\[DMAS-78753\]](#) - Fix VideoTest.testShareVideo
- [\[DMAS-78762\]](#) - Data access restriction doesn't work in ST dive log
- [\[DMAS-78763\]](#) - Unnecessary error messages while reordering my video clips
- [\[DMAS-78769\]](#) - Playlist Playback page crashes when a playlist has no clips
- [\[DMAS-78771\]](#) - SeaTube Chat Log widget's minimum height depends on the window height
- [\[DMAS-78782\]](#) - CastPopup occasionally fails tests when ran locally.
- [\[DMAS-78783\]](#) - Downloading clips from a playlist while not logged in displays an error "Network error"
- [\[DMAS-78795\]](#) - main branch of Oceans Next not building on Windows
- [\[DMAS-78805\]](#) - Position and show/hide issues on the video control bar of Playlist Playback page.
- [\[DMAS-78822\]](#) - Bathymetry page is failed to load.
- [\[DMAS-78835\]](#) - Metadata change task and DOI registration task are assigned 0 sequence numbers
- [\[DMAS-78845\]](#) - SiteDevice Subset upcast/downcast changes have globally affected all subset types
- [\[DMAS-78857\]](#) - Deployments sometimes fail with `tail: invalid number of lines '+Binary'`
- [\[DMAS-78873\]](#) - Fix failing storybook build
- [\[DMAS-78885\]](#) - Oceans Next isn't reporting jest test results
- [\[DMAS-78888\]](#) - Oceans 3 fails to restart in QA2
- [\[DMAS-78912\]](#) - Some pages don't load from the start:oceans3 script
- [\[DMAS-78917\]](#) - There are expeditions/dives missing in on-shore dive logger
- [\[DMAS-78931\]](#) - CKAN of dataset record is not available even though devices have been added through ERDDAP, CKAN jobs
- [\[DMAS-78946\]](#) - Bug in the parser for Nortek Aquadopp Profiler 2MHz, specifically at Folger Pinnacle on 2024-Jan-06
- [\[DMAS-78955\]](#) - lasso button is being duplicated on the geospatial page
- [\[DMAS-78963\]](#) - Error when editing existing playlists
- [\[DMAS-78968\]](#) - Adding a collection does not close the "Create Collection" dialog
- [\[DMAS-78985\]](#) - lasso tool on CF map contains undefined reference to assignedCastData
- [\[DMAS-78994\]](#) - Fix failing test case in [TaxonomyDetailWidget.cy.tsx](#)
- [\[DMAS-79003\]](#) - Null Pointer Exception When Logging in on Dev
- [\[DMAS-79027\]](#) - Clip deletion failing due to missing playlistHdrId
- [\[DMAS-79032\]](#) - Investigate QAQC Reprocess (job ID 359) failure for taskId 36661223
- [\[DMAS-79045\]](#) - Geospatial map lasso tool removes selected casts when performing new lasso

- [DMAS-79049] - Device Workflow Admin Phase Filter not showing up in QA
- [DMAS-79065] - Selecting casts with lasso after choosing 'Select all casts' doesn't revert button to 'select all casts'
- [DMAS-79084] - In QA, I can't update the datatype of a taxonomy attribute, or add options to it
- [DMAS-79090] - Device Workflow Admin Process Filter not showing up in QA
- [DMAS-79092] - DOI title mismatch between datacite and ONC database
- [DMAS-79106] - Accessing ComplexDataPlayer as an anonymous user will crash the browser
- [DMAS-79109] - Device Workflow Admin page can not add/delete phase
- [DMAS-79110] - Pressure data for RDI ADCP 150 kHz (SN 8580) for SOG East is incorrect in MAT and RDI data products
- [DMAS-79121] - Cannot generate dataProducts for historical casts at a station via the Community Fishers Map
- [DMAS-79125] - Error occurring in Batch Management when deselecting a batch
- [DMAS-79134] - Earthquake Detail Page site detection table is showing duplicate sites
- [DMAS-79142] - error when trying an open api query when logged out
- [DMAS-79146] - Applying filters or enabling drifter/cf sampling stations on QA DataSearch causes device tree to reload collapsed
- [DMAS-79170] - modifyDate and modifyBy is null for a new Process, Phase or phasephasetask
- [DMAS-79200] - imagenex-837-postprocess-job generate *.837 files with zero filesize in qa with release/24.01.000
- [DMAS-79207] - The XML configuration files for the AZFP Echosounder (55036) at DDL are incorrect after 2023-11-24 22:06
- [DMAS-79219] - piggyback device connect multiple ports to different port of parent device in topology is broken

Epic

- [DMAS-74103] - As a software developer, I want to upgrade our tools to use Java 17 so that we can make use of the latest features and ongoing support

User Story

- [DMAS-73635] - As a ST developer, I would like to support more than 10 onship servers
- [DMAS-75300] - As a software developer, I want to upgrade dev dependencies to match the versions used in the new Equinox
- [DMAS-77737] - As a software developer, I would like more constraints on database updates and deletes in the QA and DEV databases
- [DMAS-78371] - As a software developer, I want synchronizer database tables to use a module prefix
- [DMAS-78447] - As a dev, I would like to have modifydate and modifyby columns and trx table for device workflow related database tables
- [DMAS-78474] - As a user, I would like to see consistent names for fields Modified Date and Modified By
- [DMAS-78481] - As a software developer, I want a synchronizer management skeleton page for me to build on
- [DMAS-78494] - As a scientist using SeaTube, I want to be able to lock a playlist against editing so that links from published papers can't be broken
- [DMAS-78552] - As a software developer, I want to drop support for testing old branches with Java 8 in order to simplify maintenance and test processes
- [DMAS-78684] - As a ST user, I want to be able to create, edit, and delete playlist group from the group panel
- [DMAS-78708] - As a SeaTube user, I want video snapshots to use a more appropriate quality
- [DMAS-78933] - Add stories for map buttons, menus, sizeable sliders
- [DMAS-78939] - Add storybooks for steppers

Task

- [DMAS-37728] - remove navdata configproperties in database
- [DMAS-46729] - Jan Schluter would like a "restrict to visible area" tickbox instead of automatic filtering in data search
- [DMAS-47205] - ServerManagementService appears to be inactive
- [DMAS-67409] - As a data partner, I would like to see ScalarDataAPIService validate its user's identity so that data access restrictions can be enforced
- [DMAS-73306] - As a user, I would like to see an alert when future dates are used in QAQC Results Deletion Job
- [DMAS-74927] - As an app developer, it would be useful to have quick access to the android version of a tablet used in CF
- [DMAS-75613] - As a dev, I would like to see dialog box on device category dragable
- [DMAS-76872] - Always proxy through qamon/ncdeploy when deploying from Jenkins
- [DMAS-76942] - Add job.failed.email.recipients.job parameter for QAQC reprocessing job
- [DMAS-76961] - Make each of the data product options in the Dataset Landing Page for query PID options table links to the wiki
- [DMAS-77026] - Improve email content for the support request
- [DMAS-77818] - Print any errors thrown when installing OSGi bundles in QA/prod
- [DMAS-77950] - Remove the page header bar on the playlist playback page
- [DMAS-78013] - Lazily load Playlist apps when running Oceans Next in playground mode
- [DMAS-78301] - Replace loading spinners on Thumbnails with a Skeleton component
- [DMAS-78338] - Populate the synchronizer database tables
- [DMAS-78356] - Adjust styling in PlaylistList to add space between thumbnail and text
- [DMAS-78357] - Redirect the SeaTubeV3 Playlist playback route to the new Playlist Playback page
- [DMAS-78411] - Make DataSyncServiceActivator agnostic to whether a synchronizable manager is an OSGi service or not
- [DMAS-78528] - Refactor AsyncAutocomplete to use cancellable service calls and create storybook
- [DMAS-78585] - Design where playlist lock/unlock buttons and icons will go, how it will affect the playback page
- [DMAS-78639] - Allow colons in the field label of formfield entries.
- [DMAS-78692] - Search Hydrophone Data page does not allow to close zoomed images
- [DMAS-78711] - As a user, I would like to see consistent display for Modified By on dmas UI pages
- [DMAS-78732] - Update the playlist discovery page's Modified column if a playlist's clips are modified
- [DMAS-78739] - Update Dockerfile to use Node v20
- [DMAS-78796] - As a dev, I would like to include modifyby and modifydate in the web services for device workflows
- [DMAS-78804] - Inconsistent date formats in notification emails
- [DMAS-78824] - Add story with docs for AvailabilityChart
- [DMAS-78827] - Add stories for Filters and DragScroll
- [DMAS-78837] - scalardata get by station failing to return data
- [DMAS-78842] - The Jenkins storybook build should email the senior developers on failure

- [DMAS-78846] - Switch configuration to avoid needing to import React in every single file
- [DMAS-78853] - Unassigned casts inside station perimeter
- [DMAS-78854] - On the openapi page if a user fills out a service query while not logged in the form should keep the values after login
- [DMAS-78880] - OpenApi deployment page is missing the deviceCode filter
- [DMAS-78886] - Configure logging for OSGi tests
- [DMAS-78887] - Equinox validation should fail with a better message if gemini.service exists but /usr/local/gemini doesn't
- [DMAS-78908] - improve the performance of the get location tree public api call
- [DMAS-78909] - Update code coverage reports for Oceans Next
- [DMAS-78910] - Update code coverage reports for Oceans 3
- [DMAS-78913] - need able to deploy oceans-next code to qadivelogger4.onc.uvic.ca through Jenkins
- [DMAS-78925] - Run DigitalFishers UI tests in Renovate builds
- [DMAS-78940] - Add appToken support to external services not supporting it yet
- [DMAS-78943] - Implement TaxonAsyncAutocomplete into Dive and Deck Log
- [DMAS-78959] - Add new field auto-queue to tm_tasktype
- [DMAS-78960] - Update openAPI page and documentation for resample periods
- [DMAS-78979] - CKAN harvester won't stop
- [DMAS-78989] - Don't attempt to use Matlab if matlab as a service is turned off (Dev)
- [DMAS-79006] - Remove pagination for the first level of batch tasks
- [DMAS-79017] - Improve task original date query
- [DMAS-79021] - Update dependency react-virtualized-auto-sizer to v1.0.21
- [DMAS-79031] - Remove sequenceNumber from DAO objects
- [DMAS-79060] - Sort the AppMenu in Oceans Next
- [DMAS-79089] - Remove the current playlist from the list of Copy To Playlist options on Playlist Playback page
- [DMAS-79091] - Update tests for the ModifiedBy value on UI page
- [DMAS-79105] - update post refresh scripts with new task type column
- [DMAS-79201] - As a data steward, I would like the sensortype description field to be longer, to make state-type sensor values clearer
- [DMAS-79234] - Add logging to JMSEExceptionHandler and GenericJMSSConnection
- [DMAS-79257] - Correct checkstyle issues in GenericJMSSConnection

Implementation

- [DMAS-77504] - Implement Data Source Selection Widget
- [DMAS-77738] - Add where clause constraint to all database table updates and deletes
- [DMAS-77993] - Convert CFOverlay to a functional typescript component
- [DMAS-78032] - Make FormFieldService available anonymously
- [DMAS-78218] - Drop JDK options from Integration Testing build scripts
- [DMAS-78259] - Refactor Cast Selection Poppup out of CFOverlay
- [DMAS-78288] - Display read-only metadata when selecting a taxonomy or taxon
- [DMAS-78291] - Display a form with taxons' default attributes
- [DMAS-78293] - Delete a taxon or taxonomy when clicking Delete Taxonomy or Delete Taxon
- [DMAS-78294] - Add a taxonomy when clicking Add User Defined Taxonomy
- [DMAS-78296] - Add a taxon when clicking Add Taxon
- [DMAS-78321] - Autosave changes to default attributes
- [DMAS-78325] - Make a servlet for the synchronizer management UI
- [DMAS-78326] - Make a React page for synchronizer management
- [DMAS-78372] - Create new prefixed synchronizer tables
- [DMAS-78373] - Update hibernate mapping files to use prefixed synchronizer tables
- [DMAS-78374] - Remove unprefixed synchronizer database tables
- [DMAS-78436] - Make a base web service supporting multi-verb REST services
- [DMAS-78448] - Add modifydate and modifyby columns in phase, phasephasetask, phasetype, process, processgroup, processphase and processtype tables
- [DMAS-78449] - creat trx for phase, phasephasetask, phasetask, phasetype, process, processgroup, processphase and processtype database tables
- [DMAS-78466] - Drop ErddapDatasetAttribute table
- [DMAS-78495] - Add a lock button to the playlist details header bar on the playback page
- [DMAS-78496] - Add columns "locked" and "lockreason" to playlist_hdr
- [DMAS-78497] - Add persistence and web service code for "locked" and "lockreason"
- [DMAS-78498] - Lock a playlist when a user confirms their click on the lock button
- [DMAS-78499] - When a playlist is locked, display an unlock button in the playlist details header instead of a lock button
- [DMAS-78500] - If a playlist is locked, display it as read-only on playlist discovery
- [DMAS-78501] - If a playlist is locked, display it as read-only on playlist playback
- [DMAS-78502] - If a playlist is locked, reject edits to it in web services
- [DMAS-78545] - Drop support for deploying Oceans Next to Gemini
- [DMAS-78547] - Update Modified Date/Modified By field names for React pages created by other groups
- [DMAS-78566] - Add UI indicator and controls for automatic batch task execution
- [DMAS-78568] - Implement batch task auto-queueing
- [DMAS-78583] - Disable locked playlists in selection dropdowns for adding clips in Oceans Next
- [DMAS-78598] - Update dataprodut discovery service to show default values, request service to use default values, and open api page to display defaults in description text
- [DMAS-78626] - Add a reference URL to custom taxons (backend)
- [DMAS-78664] - Add a method to PlaylistService to update a group name
- [DMAS-78665] - Create a new Expedition Admin - ONC group
- [DMAS-78671] - Update ExpeditionOrganization.java to use the new group
- [DMAS-78674] - Update SeaTube.jsx to use the new group
- [DMAS-78675] - Create a Dialog for creating a playlist group
- [DMAS-78676] - Create a dialog for editing a playlist group name
- [DMAS-78678] - Create a dialog for deleting a playlist group
- [DMAS-78679] - Disable the add group button if there aren't any ungrouped playlists

- [DMAS-78713] - Add translations with a button base component
- [DMAS-78716] - Enable authentication when running UI tests in QA2
- [DMAS-78722] - Implement date chunking when searching for days to create NetCDF files in ErddapNetCdfPostProcessor
- [DMAS-78723] - When generating NetCDF for Erddap always produce a NetCDF file even when sourceFile does not have sufficient data
- [DMAS-78724] - Implement filtering options for ErddapNetCDFPostProcessor
- [DMAS-78774] - update column names to Modified Date and Modified By on Network Console page
- [DMAS-78793] - Refactor Create/Update Playlist buttons in SeaTube Search to be disabled/have loading indicators
- [DMAS-78806] - Hide locked playlists in selection dropdowns for adding clips in SeaTube Pro
- [DMAS-78811] - Extract StudyArea persistence code to OSGi bundles
- [DMAS-78812] - Extract data acquisition metrics to OSGi bundles
- [DMAS-78818] - Check if a taxon's originTaxonomy is editable in the default attributes form
- [DMAS-78820] - Add mapId to the context so it isn't passed around everywhere
- [DMAS-78823] - Update Modified Date/Modified By field names for Device Details, Site Device and Dive page
- [DMAS-78825] - Add a Properties table for imported taxonomies and their taxons
- [DMAS-78828] - Replace Jetty with Tomcat in dev
- [DMAS-78829] - Run dev on the root context path
- [DMAS-78830] - Remove the distinction between dev and prod bndrun files
- [DMAS-78833] - Update VideoSnapshotService to use the appropriate quality source for snapshots
- [DMAS-78834] - Set the video quality to use for playlist thumbnails
- [DMAS-78841] - Remove several unused dependencies
- [DMAS-78847] - Derive the location of Oceans Next automatically
- [DMAS-78849] - Only allow open tasks to swap sequence numbers
- [DMAS-78851] - have the running status chip on task management be green
- [DMAS-78852] - Change "Group" to "Collection" for current playlist group components
- [DMAS-78856] - Set the video quality to use for dive log snapshots
- [DMAS-78864] - Extract labels from Buttons.jsx and organize them into translations.json (en)
- [DMAS-78871] - Default the locking service code to use the previous lock values if none are passed
- [DMAS-78875] - Implement basic task pipelines
- [DMAS-78889] - Remove unnecessary notes about .ssh/known_hosts in Oceans Next deployment Jenkinsfile
- [DMAS-78892] - Add projectid column to organizationagreement table
- [DMAS-78893] - Create dal layer for organization agreement local context project id column
- [DMAS-78896] - Increase mod count
- [DMAS-78907] - Refactor TaxonForm.tsx into different components for editing and adding
- [DMAS-78911] - Update global.baseurl in dev
- [DMAS-78915] - Update Modified Date/Modified By field names for Expedition Maintenance, Sensor Maintenance - Additional Attributes Tab, SeaScript Editor
- [DMAS-78924] - Deprecate the old Button.jsx file and add a warning comment to the top of Buttons.jsx
- [DMAS-78935] - Refactor GenericSystemCommandActivator as an OSGi whiteboard
- [DMAS-78944] - Convert High and MediumEmphasisSubmitButton to use new format
- [DMAS-78945] - Convert DeleteButtonRed to new format
- [DMAS-78954] - Convert ImageUploadButton, ChooseFileButton, MediumEmphasisChooseFileButton to new format
- [DMAS-78965] - Convert Generic*, FloatRight* Buttons to use new format
- [DMAS-78973] - add default values for modifyby and modifydate in device workflow related tables
- [DMAS-78976] - General cleanup of unused features of NeptuneVelocityServlet
- [DMAS-78984] - Make use of taskOutput in ErddapNetCdfPostProcessor
- [DMAS-78993] - Compare creation date of NetCDF file to source file during job run
- [DMAS-79009] - Create batchable task that deletes files from Erddap NetCdf file store - SQL
- [DMAS-79010] - Create batchable task that deletes files from Erddap NetCdf file store - Java
- [DMAS-79016] - Refactor the ToolbarButtons used in Buttons.jsx
- [DMAS-79018] - Update public api citation response
- [DMAS-79019] - Improve batch task pagination
- [DMAS-79020] - Handle source archivefiles that span multiple days
- [DMAS-79037] - remove sequencenumber from ONC DAO objects
- [DMAS-79039] - Create RDI ADCP Cassandra to NetCdf changeover job - Java
- [DMAS-79040] - Create RDI ADCP Cassandra to NetCdf changeover job - SQL
- [DMAS-79046] - Add DeviceTypeAttribute to track android SDK version for devicetype 267
- [DMAS-79050] - Implement API location tree filters
- [DMAS-79051] - Add column to tasktype
- [DMAS-79055] - Add ADCP Wave device type to ERDDAP RDI ADCP NetCDF Generation Job
- [DMAS-79061] - add Modified Date and Modified By to Process Group
- [DMAS-79068] - Batch Task pagination service changes
- [DMAS-79069] - Use new /netcdf_data volume to store NetCdf files for use with Erddap
- [DMAS-79077] - Use a timeout when generating NetCdf files for Erddap
- [DMAS-79080] - Allow multiple blacklist/whitelist dateranges to be specified for one device
- [DMAS-79199] - Sometimes NetCdf files can be generated each time the job runs when they should not be

Test

- [DMAS-76365] - Update the synchronizing test plan to properly document where messages should be sent
- [DMAS-78918] - Need test group-user synchronization for the new group in QA

Bug (ST)

- [DMAS-78622] - Deleting a taxon doesn't work if it has been imported
- [DMAS-78870] - Add padding that Button.jsx adds to reduce visual changes when refactoring
- [DMAS-78966] - Support an argument on the --jdk option for Oceans 3 deployments
- [DMAS-78992] - Error colored buttons don't style correctly when disabled

- [\[DMAS-79012\]](#) - Fix Batch Task Pagnation ONC
- [\[DMAS-79013\]](#) - Fix Batch Task Pagnation Oceans next
